PROJECTS

Synco – AI-Powered Job Preparation Web Application

11/2025 – 02/2026

Tech Stack – React.js, Node.js, Express.js, MongoDB, Gemini API, JWT

Description—

- Developed a job preparation platform that helps users improve interview readiness through resume analysis and personalized preparation tools.
- Analyzed resumes and job descriptions to generate customized preparation reports with skill-gap insights.
- Generated role-specific interview questions and personalized learning recommendations using AI.
- Implemented secure JWT authentication for user registration and login.

ProLinker – AI-Powered Professional Networking Platform

01/2026 – 03/2026

Tech Stack – React.js, Tailwind CSS, FastAPI, PostgreSQL, WebSocket, Supabase, Cloudinary

Description—

- Developed a responsive LinkedIn-like user interface with profile management, posts, and a dynamic news feed.
- Built reusable React components and interactive pages to deliver a clean and user-friendly experience across devices.
- Integrated frontend with backend APIs to display user profiles, posts, AI chat, and real-time updates.
- Designed a modern and responsive UI using Tailwind CSS, ensuring a seamless user experience.

CERTIFICATION

Data Analytics with Python – IIT Roorkee (NPTEL)

Fundamental Algorithm: Design and Analysis-IIT Kharagpur (NPTEL)
